

REPORT ON SEMINAR CONDUCTED ON 15 OCTOBER 2019

TITTLE - SEMINAR ON CREATING AWARENESS ON INTERNET AND NETWORKING.

PARTICIPATION:

In the seminar maximum 30 students of B.tech(cs) participated to enhance their knowledge related to internet and networking. Also our faculty support us to conduct the seminar smoothly and efficiently.

SEMINAR DESCRIPTION:

The main objective was to make sure that every student must get an overview of internet and networking so it can help us to be aware of cyber attacks or of using unsecure networks.

The seminar covers the topics such as

- What is internet?

- ARPANET

- Bandwidth, latency, bit rate

- How network signals transmit from one place to another.

- What is packet of information.

- What is TCP?

- Internet protocol (IP Addresses)

- What is DNS ?

- HTTP

- Encryption and Decryption

- Viruses

- Know more about DDOS

- A threat : Phishing scam

We got an overview of all the topics mentioned above. These topics help us a lot to strengthen our memory and build it powerful up to some extent.

Feedback :

After the conduction of the seminar we got a positive feedback of the

but as we know we can work on them .students had given the feedback that the session was a good interactive session with a good choice of topics but they also said that at the end there connectivity to connect with the session got lost due to its long duration, but we can work on this suggestion that not to exceed the session much.

Do you have any suggestion for the format?

13 responses

No

Good or bhi hona chahiye

Nope, your team is doing good. Keep it up buddy

As you know that we are cs students.
Topics are of low level.
You should take topics that is not known by much people.
Topic should be different which gives interest to the listeners.
It feels just like a normal routine class. 🤔
All the best for the next session.
GOOD LUCK! 🍀

Divide session into two parts and offer a break of 10 minutes

No suggestions ...just want to say that if the time limit could be reduced and few of the topics must needed to be more clearly explained like today i think that the topic in which the speaker talk about packets , this topic not clearly understood by others .i thought ...but at the last that was quite good lecture

please entertain the students in between the session also

Need more work on selection of topics at a time .
